970 TeenNick Collection

nickelodeon ROOMS

970 TeenNick Collection

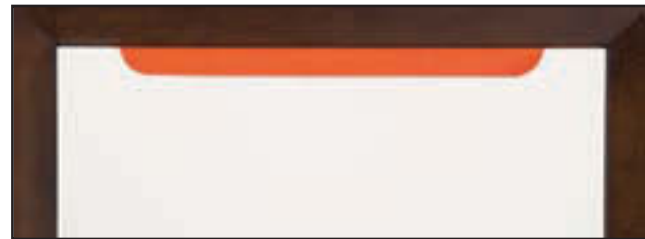

Teens don't consider themselves kids anymore, which is why Lea designed the TeenNick collection to offer more sophisticated and contemporary gathering places. Rich, dark woods combine with white drawer fronts and accents of orange to create furniture that can easily go from their bedroom at home to their dorm room or apartment.

Electronics are a big part of a teen's world, so it's a big part of the TeenNick furniture. There are plenty of places and spaces for the must-have technologies of the day, including laptops, cell phones, game consoles, TV's and MP3 players. Add in a nesting chaise, one of the futons or a rocker chair, and their room will be THE place for friends to hang out.

With TeenNick, there are many creative options on where to sleep: a mixed media study loft bed; a very contemporary panel bed with nightstands; unique storage headboards where the mattress fits inside the headboard; and a daybed with optional "study wall" and entertainment/media headboard - creating a "room within a room." Rooms stay neater with the ample storage built into each piece. And we've built mobility into many of the pieces, including the wheeled entertainment stand and desktop that can swivel 360 degrees.

With TeenNick from Nickelodeon Rooms, they may never want to leave their room!

970 TeenNick Collection

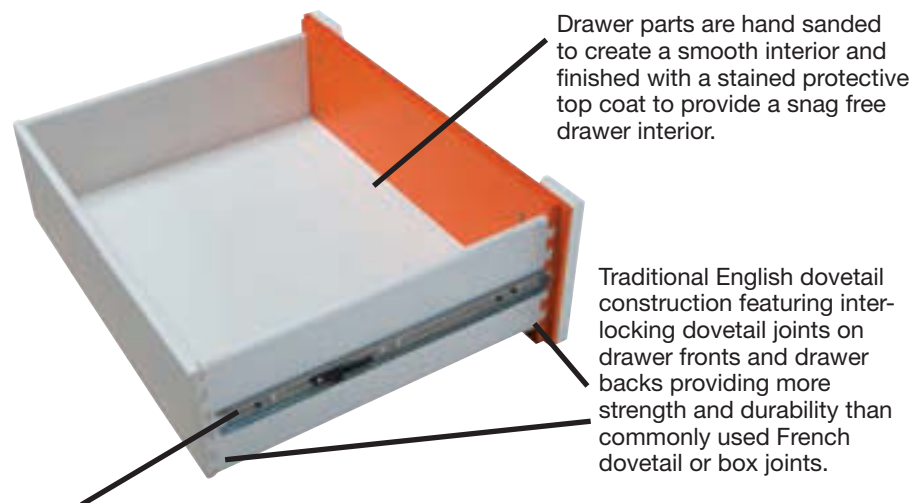

Chocolate Wood-Color Finish with Painted White and Orange Accents

The Nickelodeon Rooms Collections use higher quality materials, combined with innovative and fun designs that grow with your child. These features create a step-up design usually associated with more expensive quality furniture.

The TeenNick Collection is finished in a Chocolate wood tone color finish with painted white and orange accents, creating a unique tri-finish look.

The assortment and versatility of bed options makes this a collection suitable for all ages. Beds are offered in multiple sizes with options for underbed storage units.

Superior Drawer Construction

Drawer parts are hand sanded to create a smooth interior and finished with a stained protective top coat to provide a snag free drawer interior.

Traditional English dovetail construction featuring interlocking dovetail joints on drawer fronts and drawer backs providing more strength and durability than commonly used French dovetail or box joints.

Drawers that extend completely out of the case provide more useful storage space with easier access to the contents of the drawers.

Drawers also feature automatic drawer stops to prevent drawers from falling out of the case.

Drawer bottoms that are reinforced by corner blocks.

Sturdy Case Construction

Drawers feature full extension drawer guides with steel ball bearings that provide easy one-handed smooth operation and greater drawer stability than standard center mounted drawer guides. Drawers also feature automatic drawer stops to prevent drawers from falling out of the case.

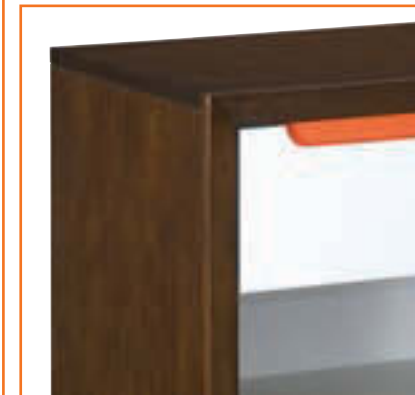

Hardwood frames with protective panels between each drawer help keep clothes dust free.

Back panels are recessed and attached by screws providing more strength and structural integrity than stapled-on back panels.

Safety and Bed Construction

Lead free child safe finishes that meet all US Safety requirements.

Sturdy construction and shaped edges on beds and case pieces make this collection even more "kid-friendly."

Slat roll mattress support systems providing mattress support without the need for a boxspring or a bunkie board come standard with all beds. Each slat fastens with a screw providing additional strength and structural integrity to the beds.

Anti-tip over restraint kits that secure the case to the wall to prevent cases from tipping over are included with all cases 30" tall or taller.

All beds feature metal connectors for strength and lasting durability and to prevent unintentional rail detachment.

Beds that comply with all ASTM consumer safety standards.

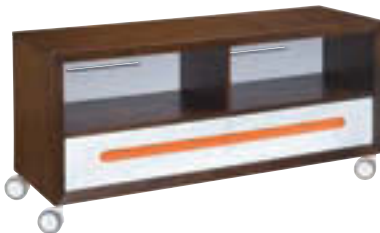

Loft Bed steps and guardrails that attach with metal screws and metal-to-metal fasteners to provide strength and security.
